JEFFREY FABELLA

Full Stack Software Engineer & IT Project Manager

La Union, Philippines | +63 962 524 0667 | jeffrey.t.fabella@gmail.com

Developer Portfolio | GitHub

EXECUTIVE SUMMARY

Results-driven IT professional and Full Stack Software Engineer with over 7 years of experience delivering full-cycle software solutions, scalable web applications, and enterprise systems. Currently working at Slick Digital in Stillwater, Minnesota, developing an ERP platform for the landscaping industry with a strong focus on backend development, API design, and full-stack feature implementation.

Proven expertise in document management systems, e-signature platforms, ERP solutions, and cloud-based architecture. Skilled in building and optimizing applications using ReactJS, Next.js, Node.js, and MongoDB, with strong experience in database optimization, and GCP technologies. Known for improving system performance, and delivering high-quality applications across fintech, gaming, ERP, and enterprise SaaS domains.

PROFESSIONAL EXPERIENCE

SLICK DIGITAL / PIVOTLY – *Minnesota, USA*

Full Stack Software Engineer

May 2025 – Present

- Contribute to the development of an ERP platform for landscaping businesses, supporting core operations including customer management, sales, scheduling, and financial workflows.
- Lead backend feature development and API implementation, building scalable services and database solutions that support complex business processes.
- Optimize application performance, maintain code quality standards, and support deployments across development, staging, and production environments.

GLOBAL APPLICATION PRODUCERS – *Claremont, Australia*

IT Project Manager / Database Admin / QA Specialist

February 2021 – May 2025

- Led the end-to-end development of Pachi+ and Pachi Exchange, overseeing project planning, backend architecture, QA, and deployment across cross-functional teams.
- Enhanced Gameworkz Fortune 8 with new features that boosted engagement and reduced bug reports by over 60%.
- Optimized database performance with MariaDB and Navicat, improving query speed, system uptime, and overall workflow efficiency.

UNAWA Inc. – *Makati City, Metro Manila*

IT Project Manager / Business Analyst

April 2022 – September 2024

- Directed enterprise-level projects including the Supreme Court Document Management System, driving digital transformation in high-security, high-volume environments.
- Delivered cloud-native platforms such as SignSecure, ForMA, and UCheck using MongoDB
- Strengthened product quality through effective test strategies and client collaboration, reducing post-release bugs by over 70% and improving delivery timelines.

TECHSPHERE / RANGERTECH – *Pasig City, Metro Manila*

IT Project Coordinator / Web Application Developer

February 2020 – March 2021

- Developed responsive web apps using React, enhancing user experience and engagement for platforms like RACEHUB PH and ITG's chatbot.
- Led coordination of deliverables, timelines, and cross-functional communication to align development with client expectations.
- Launched a custom CRM system for Microtel by Wyndham, streamlining customer management and automating lead tracking.

ACCENTURE PHILIPPINES – *Quezon City, Metro Manila*

Data Analyst

February 2018 – December 2019

- Evaluated and processed high volumes of user content in compliance with internal guidelines.
- Improved review accuracy and workflow efficiency by 20% through team collaboration.
- Recommended process improvements adopted across multiple project teams.
